

Sketching Functions

- 1) a) Sketch the graph of $y = 3x - 4$ on the axes, showing clearly where it crosses the y -axis.
b) Sketch the graph of $y = -2x + 3$ on the axes, showing clearly where it crosses the y -axis.

- 2) a) Sketch the graph of $y = x^2 + 2$ on the axes, showing clearly where it crosses the y -axis.
b) Sketch the graph of $y = -x^2 - 1$ on the axes, showing clearly where it crosses the y -axis.
